DESIGN ARCHITECT

RICARDO BOFILL
TALLER DE ARQUITECTURA

A legendary studio at the forefront of the urban design and architectural profession, Ricardo Bofill Taller de Arquitectura (RBTA) is renowned for its visionary humanism and cultural intelligence in settings across the world. Its wide-ranging experience with large-scale international projects, residential districts, retail centers, office complexes, five-star hotels, and private residences have produced a new form of smart integrated urbanism, a place where city, nature, and history intersect. Ricardo and his brother Pablo Bofill co-direct RBTA.

40 km north of the city center, on the West bank of Dagu River, Qingdao Airport is planned within an area of 18.3 square kilometres. It will operate mainly domestic and cargo flights, processing 38 million passengers yearly by 2025 and 58-60 million passengers per year by 2045. The airport's single building approach extends RBTA's concept applied in Barcelona's Terminal 1, which proved to be very functional, and highly cost-effective.
